

e-Safety

If you suspect it, report it!

We all use technology in our everyday lives and it is vital that we are able to use it safely. In the event that we feel unsafe about something, we need to know what to do.

Through assembly and tutorials you will discuss the potential issues, hazards and precautions you can take when spending time in online environments such as chat rooms, online gaming worlds, IM, online shopping, email, SMS and social networking sites. To refresh yourself, or to learn more, use the links below.

The school has an acceptable use policy (AUP) that endeavours to ensure maximum online safety whilst we are in the school environment by educating all of our community and preventing access to non-educational sites.
